About Program:

Objective:

The objective of the seminar is to discuss ethical principles and commit to professional ethics (po6, po8) and responsibilities and norms of the engineering practice through the teachings of swami Vivekananda.

To improve quality of life to get satisfaction and peace in life we need to focus on quality of thoughts in mind.

Controlling thoughts in mind through meditation and group prayer..

Activities performed:

In the session, the speaker shared information about secrets of mind, effect of thoughts on our body by giving live example of aruni simha.

Explained following quotes:

1. Arise, awake and stop not till the goal is reached.
2. Take up one idea. Make that one idea your life; dream of it; think of it; live on that idea. Let the brain, the body, muscles, nerves, every part of your body be full of that idea, and just leave every other idea alone. This is the way to success, and this is the way great spiritual giants are produced.
3. "We are what our thoughts have made us; so take care about what you think. Words are secondary. Thoughts live; they travel far."
4. "In a conflict between the heart and the brain, follow your heart. "
5. "Whatever you think that you will be. If you think yourself weak, weak you will be; if you think yourself strong, you will be."
