One of the best ways to boost your IT career is to get a Microsoft Certification. Whether you work (or want to work) as an IT professional, analyst, developer, system, or database administrator, a Microsoft Certification can help you prove your skills and increase your chances of getting hired or promoted.

Microsoft offers a number of certifications and despite the recent changes made by the Microsoft Training department to simplify the certification paths and categories, some students still find it difficult to decide which path to follow and which certifications to pursue.
