**Mode of conduction:** Online

### **Resource Persons:**

Name: Mr. Prashant Chaparwal

Experience: 6 years

Company Details: Assistant Manager ,Vodafone Shared Services , Pune

## **Objectives of Course**

The objective of this course is designed to give the student an introduction to the SQL database language, and to databases - their purposes and terminology.

### **Introduction:**

A database is an organized collection of data. It is the collection of schemas, tables, queries, reports, views, and other objects. The data are typically organized to model aspects of reality in a way that supports processes requiring information, such as modeling the availability of rooms in hotels in a way that supports finding a hotel with vacancies.

A database management system (DBMS) is a computer software application that interacts with the user, other applications, and the database itself to capture and analyze data. A general-purpose DBMS is designed to allow the definition, creation, querying, update, and administration of databases.

SQL is a database computer language designed for the retrieval and management of data in a relational database.

### **Session By Mr. Prashant Chaparwal**

Mr. Prashant has covered the theory as well as practical hands on SQL. He has started with the basic of SQL and conducted hands on practice and motivated the students to accept challenges in future during this course.
