Expert Lecture Details

Subject: Structured Query Language (SQL)

Attendee: 41 Third Year Students

Organized By: Department of Computer Engineering, MMIT, Lohgaon-411 047

Date: 5th October 2019

Resource Persons:

Name: Mr. Prashant Chaparwal

Experience: 5 years

Company Details: Vodafone Shared Service Ltd

Objectives of Expert Lecture

The objective of this expert lecture is bring about concept of database management system and Structured Query Language (SQL)

Introduction:

A database is an organized collection of data. It is the collection of schemas, tables, queries, reports, views, and other objects. The data are typically organized to model aspects of reality in a way that supports processes requiring information, such as modeling the availability of rooms in hotels in a way that supports finding a hotel with vacancies.

A database management system (DBMS) is a computer software application that interacts with the user, other applications, and the database itself to capture and analyze data. A general-purpose DBMS is designed to allow the definition, creation, querying, update, and administration of databases.

SQL is a database computer language designed for the retrieval and management of data in a relational database.

Session By Mr. Prashant Chaparwal

Mr. Prashant has covered the theory as well as practical hands on SQL. He has started with the basic of SQL and conducted hands on practice and motivated the students to accept challenges in future during this course.

Following topics are covered in the expert lecture

1. PL/SQL Block
2. *Procedure* and Functions
3. *Cursors*
4. *Triggers*

Program Outcomes

- Students has understood concepts Structured Query Language (SQL)
- Students has understood practical assignments based on PL/SQL block, Triggers, Cursors, *Procedures* and Functions
- Students got clear idea about implementation of SQL concepts

Session By Mr. Prashant Chaprwal
